

Globachem – Analytical scientist

As an Analytical Scientist, you will contribute to the development of Globachem Discovery's analytical services within the field of Crop Protection Research & Development. You will combine hands-on laboratory analysis, method development and scientific problem-solving to provide practical support across the business.

- You perform hands-on laboratory analyses and provide practical analytical support for Globachem's R&D activities.
- You develop and implement new analytical methods and services to support evolving R&D needs.
- You are responsible for maintaining the analytical instrumentation at Globachem Discovery.
- You apply different analytical techniques, including UPLC-MS, HPLC, GC-FID and UPLC-TQMS.
- You carry out high-throughput log D and solubility assays.
- You analyse proteins using appropriate analytical techniques.
- You collaborate with colleagues from different scientific disciplines to solve analytical challenges and deliver high-quality results.
- You will report to the Operating Officer.
- You hold a BSc, MSc or PhD in a relevant scientific discipline. 4 years of experience in the industry is desirable.
- You are proficient in Microsoft Office and have experience troubleshooting Waters and Agilent instruments in an analytical laboratory environment.
- You are eager to learn and confidently put new knowledge into practice.
- You are a strong team player with a can-do attitude and excellent problem-solving skills.
- You are proactive, use your initiative and are willing to think outside the box.
- You are eligible to work in the UK.
